How to Find Texan Bay Jungle Lodge and Marina

By road / International airport

The easiest way to come to see us by road is to get to the town of Fronteras (also known as Rio Dulce) in the department of Izabal. Then take a 35 minutes boat ride in the direction of Livingston. Fronteras is a 5 hours bus ride from the capital, Guatemala city or 4 hours from San Pedro de Sula airport in Honduras. There is also a private airstrip in Rio Dulce for charter or private plane

By boat

Coming from the West Caribbean sea, you should officially enter Guatemala in the port of Livingston in Amatique Bay. Livingston is at the mouth of the Rio Dulce river on your starboard side when you are coming in from the sea and there are sand bars at the entrance.

To enter the river, locate the black sea buoy 3/4 miles off shore (GPS position as provided in the Freya Rauscher guide 3rd edition - **Lat 15.50.08 Long 88.43.89**) which you leave to your port side. From there you should see (approximately 1 mile away) the point where the river enters a canyon.

Follow an imaginary line that would take you to the left wall of the Rio Dulce river canyon, proceed on that line until you are level with a gas station on your starboard side .

You can anchor around here, get your entry papers ready and call Raul on VHF CH 16 or 68 or telephone (011 502) 5510-9104.

As soon as your paperwork is completed you can motor up the river,

Texan Bay Marina is only 7 miles away from the sea buoy.

The river is fairly deep and as long as you stay in the center and on the inside of curves you will not encounter problems.

Your journey will start through a breathtaking canyon for a few miles, you can start to appreciate the jungle there and the many birds.

After a few miles the river will widen and the canyon walls will start falling away.

Soon you will arrive at the entrance of the lake, El Golfete - head for Wp 2; Check it on the picture below (GPS WPT 2 - N 15° 46.713 W 088° 49.358)

Note - go all the way to the waypoint and do not turn before because the port side corner has some underwater concrete pilings that cannot be seen from the surface.

From Wp 2 proceed to port to the Wp 3 (GPS WPT3- N 15° 46.307 W 088° 50.077)

As you approaching the waypoint (wpT.3) you should be able to see our sign on the shore to port

And be able to see the entrance to our marina and some boats (Just to the right of the man in the canoe).

Stay in the middle of the channel, check on the aerial picture below (Channel depth here is 10 to 13 feet), if any doubt call us on the vhf channel 68 and we will direct you by radio or come and get you with great pleasure.

The GPS position of Texan Bay dock is N 15° 46.034 W 088° 49.644.

Next, start to relax and come and see us in the bar for your welcome drink, we will be impatient to meet you.

If you are manoeuvring within the Laguna, please stay clear of the area to the east of our docks as it is used by the Launcheros for sight seeing trips on a regular basis.

Note The above is for information only and should be used in conjunction with the relevant charts and pilots.

For Tides and up to date information see also the Rio Dulce cruisers web site www.riodulcechisme.com
